Supplier Quality Agreement: Ardent Tube Co. (summary)

Fictional sample data for CiteSure. Fernhollow Bicycle Works is an invented company. Classification: Confidential, Engineering only.

Scope

This agreement covers the 6061 and 7005 aluminium frame tubes that Ardent Tube Co., a fictional supplier, delivers to the Fernhollow frame shop. It took effect on 1 April 2026.

Quality targets

The delivered defect rate must stay at or below 0.5 percent of tubes per quarter.

Every new or changed tube needs an approved PPAP (production part approval) package before the first production delivery.

Incoming inspection samples each delivery at AQL 1.0. Wall thickness must be within plus or minus 0.05 mm of the drawing.

Handling defects

When Fernhollow reports a defect, the supplier sends a containment plan within 24 hours and a complete 8D report within 10 working days.

If the defect rate is above 0.5 percent for two quarters in a row, the supplier is placed on controlled shipping at its own cost until the rate is back on target.
